*Access | Equity | Advocacy | Innovation*

Aliados Health
Promising Practices

Do you have a promising practice to share with your peers?

Maybe you implemented a new workflow or tool, improving clinical quality outcomes, staff and provider satisfaction, or patient engagement. Aliados Health is ready to interview your team and document what you learned so it can be shared with other community health centers!

**We are particularly interested in identifying Promising Practices related to:**

- Diabetes
- Behavioral Health
- Social Determinants of Health
- Staff and Provider Satisfaction and/or Retention
- Patient Engagement

1. Shared Clinical Guidelines: Agreed to by Aliados Health Medical Directors/CMOs for each health center

2. Clinical Decision Support and Analytics: Recalls, Alerts, Order Sets, Templates, Standard Reports

4-Point Evidence-Based Care Programs

4. Population Health and Quality Improvement Support: Provider/Staff Education and Technical Assistance

3. Shared Best Practices: Peer Network Meetings and Documented Promising Practices

How does this work?

Aliados Health staff will interview you about your Promising Practice and document your project in our standard template. You will have the opportunity to review and provide feedback on the Promising Practice before it is shared via our newsletter, website, and peer groups. If others pilot test your promising practice, we'll ask them to share their results as well!

Documenting a Promising Practice

Aliados Health or CHC identifies measure improvement or successful strategy to document as a Promising Practice

Aliados Health schedules 30 min interview with health center and invites appropriate team members

Promising Practice is documented by Aliados Health using standard format and reviewed by health center for edits

Health center presents Promising Practice during an Aliados Health peer group meeting and document is posted to Aliados Health website and announced in weekly newsletter

Promising Practice is used by network members for spread and further testing. If a Promising Practice is adopted/adapted and tested by another health center, update is added to documented Promising Practice describing outcomes.

Have you tested or applied an *existing* Promising Practice at your health center?

Aliados Health wants to learn about your work! Tell us about your experience, the project you tested, and any outcomes you can share about what was successful and what didn't work. Aliados Health will document your response in our new *BUILDING THE EVIDENCE BASE* template that will be appended to the relevant Promising Practice. We're particularly interested in learning how Promising Practice outcomes may be influenced when the practice is implemented at a large or small health center, with a different population, or with a different EHR.

Where can you find existing Promising Practices?

Health center Promising Practices are located at: https://aliadoshealth.org/population-health/promising-practices/

Contact Arlene Peña apena@aliadoshealth.org to learn more or to schedule an interview.
