# Breast Cancer Screening Change Package

## PURPOSE

Compiles an organized list of evidence- and practice-based changes and associated tools and resources to improve breast cancer screening.

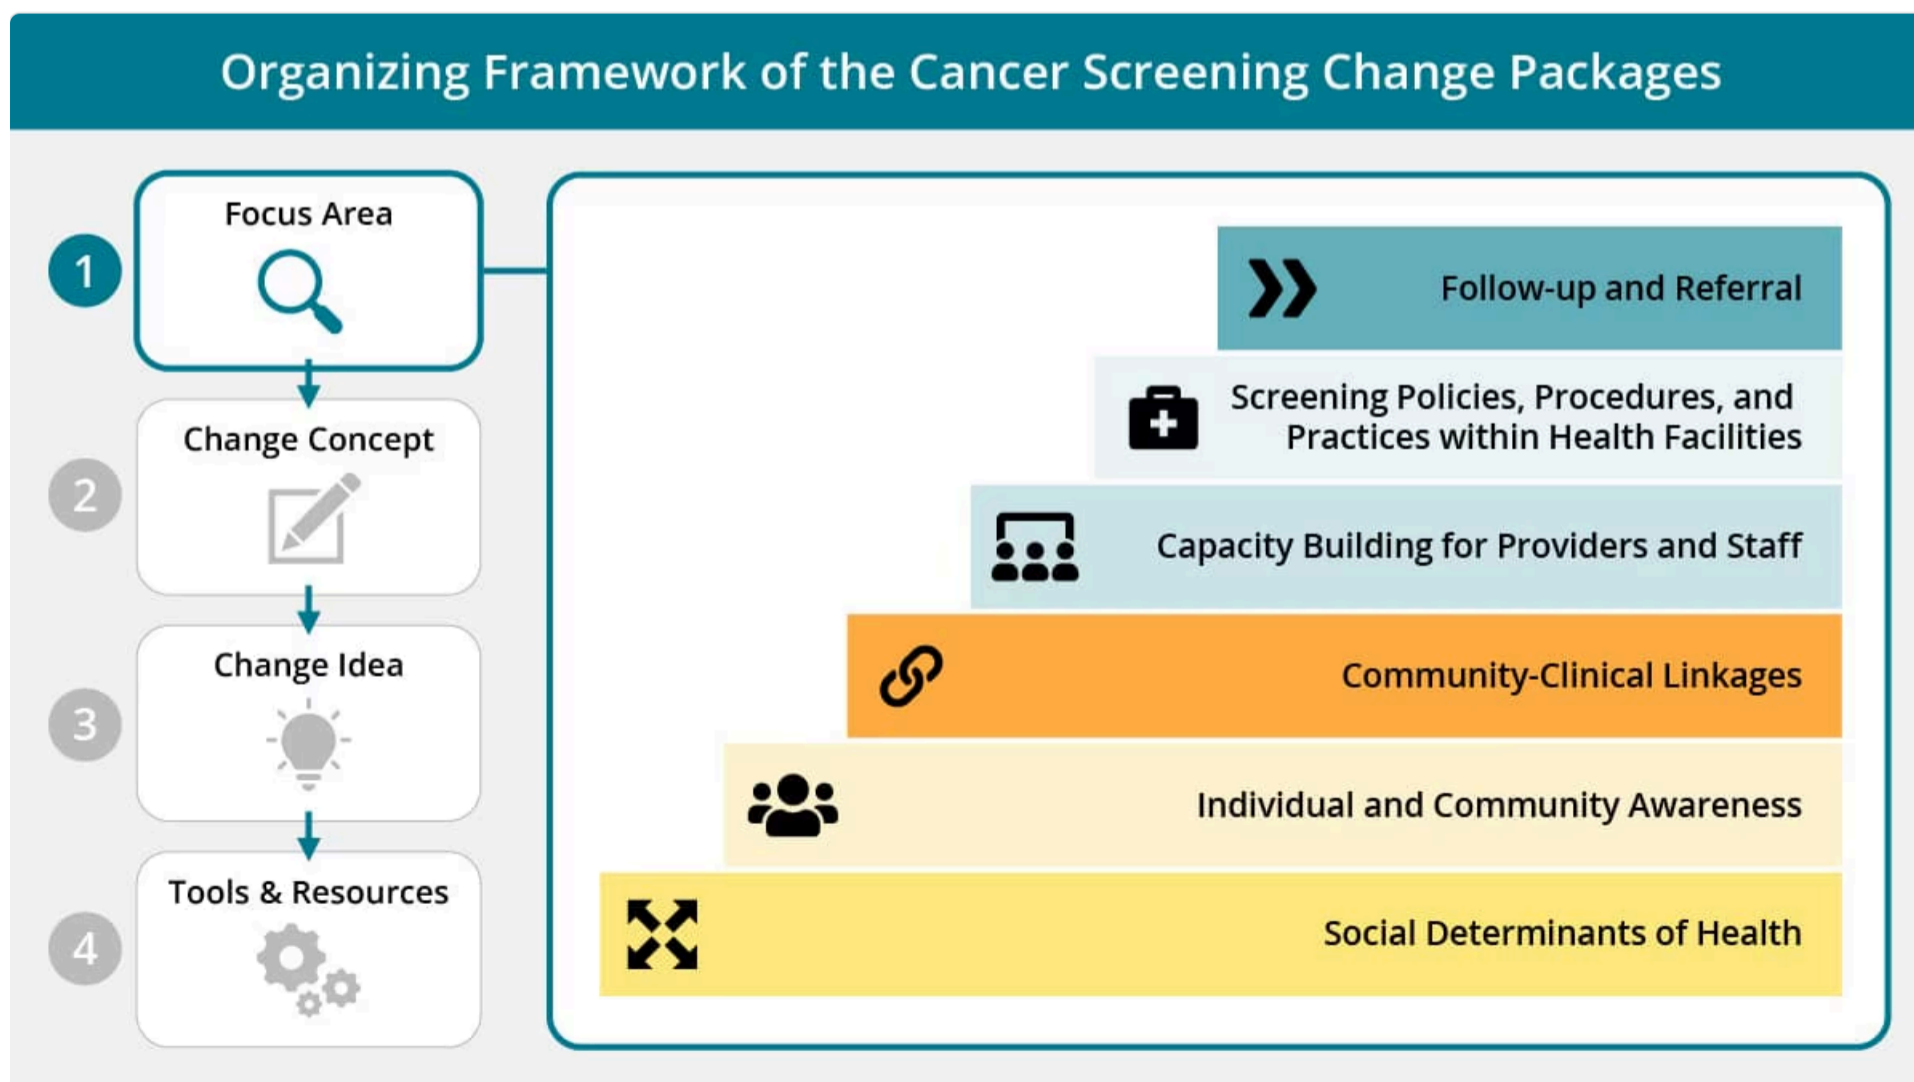

## Overview

The Breast Cancer Screening Change Package is part of the [Cancer Screening Change Packages Toolkit](#). The tools and resources in the Breast Cancer Screening Change Package are for women who:

- Are ages 40 to 74 years.
- Do not have signs or symptoms of breast cancer.
- Have not been diagnosed with high-risk breast lesions, breast cancer, or underlying genetic mutations.
- Do not have a history of chest radiation at a young age.

See the [US Preventive Services Task Force recommendation](#).

The organizing framework of the cancer screening change packages. Focus areas build on one another.

To help you choose a focus area, read the descriptions below or view the organizing framework in the [Cancer Screening Change Packages: Overview](#). [PDF](#)

## Focus areas

### Breast Cancer: Social Determinants of Health

Resources to educate people about the non-medical factors that influence health outcomes.

### Breast Cancer: Individual and Community Awareness

Resources to increase awareness about and demand for breast cancer screening.

### Breast Cancer: Community-Clinical Linkages

Resources to implement outreach and referral between community and clinical organizations.

### Breast Cancer: Capacity Building for Providers and Staff

Resources to increase clinical staff knowledge and improve breast cancer screening practices.

[Breast Cancer: Screening Policies, Procedures, and Practices](#)  
Resources to improve breast cancer screening rates in a clinical setting.

[Breast Cancer: Follow-up and Referral](#)  
Resources to refer for follow-up when breast cancer screening test results are abnormal.
